

Case Study

The Music Connection

Owner: Thomas Heymann

Industry: Entertainment

The Problem

After leaving the corporate world for his own business, the owner had to focus on client acquisition and doing the work itself. There was no time to research the proper business set up. They needed to outsource this to someone who understood small to medium business.

The Process

Within hours Vasin set up an ABN for The Music Connection and had their business registered for GST. We also advised on the creation of a legal tax invoice to ensure no future complications. We have been monitoring the business's tax deadlines to avoid unnecessary fines and lodge their BAS statements so they can focus on their core business.

The Outcome

Vasin has helped The Music Connection become a more disciplined and responsible business. As they have clients based overseas, registering the business for GST has provided them with a handy refund each quarter.

The Quote

"After struggling with cash flow for 5 years, Daniel helped me develop a plan where I put aside 10% of income for one year and it really helped me create a financial buffer. I haven't looked back. It's saved me a lot of stress, that's for sure. I've had an 8 year relationship with Vasin. My calls to their office have always been answered within hours and they're always very careful and analytical".
